ACTIVE SOLUTIONS

PLAYGROUND

Innovative solutions and quality results are created with Finnish expertise, experience and hands-on kind of attitude

We design, create and build activity parks, water parks, skateboarding areas and other sports areas & playgrounds. We offer the ideas, consulting, planning, design, building and leadership for each project.

PLAYGROUND

Active silliness, moving while playing and having fun increases both physical and mental wellbeing, for people with all ages.

With our projects we challenge ourselves and others to have fun and move everyday.

Inspiring Skateparks - design, planning and building

- Originally we started using Wood as our main material and that's our preferred way to build parks still. Wood is a wonderful material for indoor use and it enables a lot. Wooden parks need to be maintained time to time, but they also can be updated and renewed easily.
- When creating Concrete parks we are collaborating with Partner Concrete Proof who will do the skatepark building.
- Skateparks are not just for skaters nowadays, they are a place for all ages to play around. We challenge ourselves to make better, more innovative multifunctional areas combined with different sports.

Wooden Skateramp for Outdoor and Indoor

Dudesons Activity Parks in Finland

- Playground's first complete park was Dudesons Park at Tornio 2016. 2000m² full of activity park craziness! Journey continued to Espoo and Mall Big-Apple, where we built designed a park with Dudesons theme. Nearly 1600m² of activity areas like trampoline park, ninja tracks, Skateboarding area, Racket sports area, toddler playground... List goes on and on!
- <https://www.dap.fi/espoo-iso-omena>
- <https://www.lappari.fi/lappari/duudsonit-activity-park/aktiviteetit/>

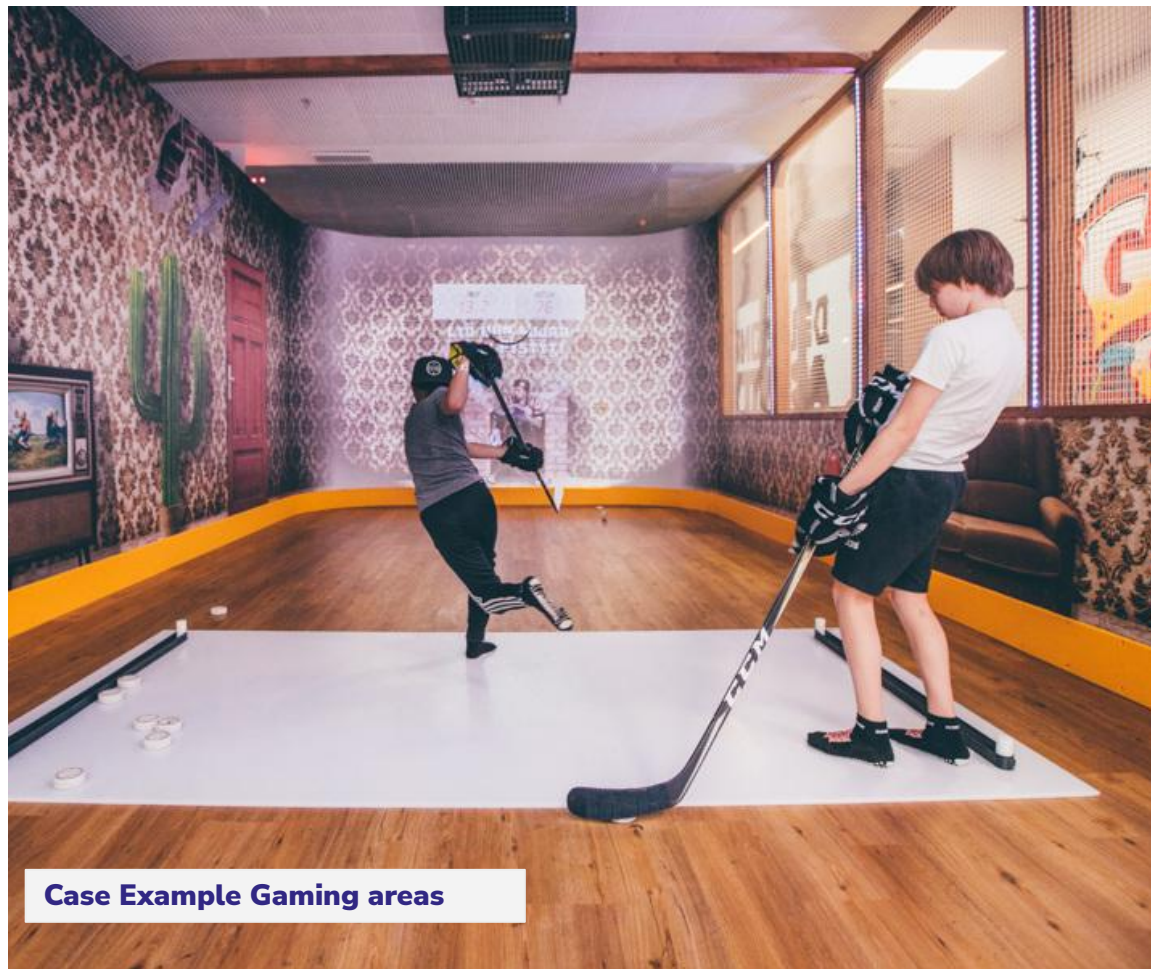

Wood as the main material

- Ecological and nontoxic increadience – this is important to us, the employees in the parks and the customers using the parks.
- It reflects a sense of warmth

Made in Finland

- We choose and use materials and contractors from Finland, whenever it is possible.
